4. DESCRIBE PROJECT - Describe any work checked in #2 and #3 above. Attach additional sheets as needed.

The property has a detached single car garage and carport that was erected long after the original house was built. The garage door has deteriorated and the hardware has been damaged by trucks cutting the corner. They are both in need of replacement since this poses a safety and security risk. This structure was broken into and now has an alarm system. We would like to replace the damaged door with an overhead door identical to the doors on the two garages directly across Long Street and identical to many in the neighborhood as can be seen in the attached photographs. The door and trim would be painted white to match the trim on the garage and the house.
