

CITY OF BETHLEHEM
INTER-DEPARTMENTAL CORRESPONDENCE

SUBJECT: Request for Approval by City Council of a New Ordinance
Determination of Stormwater User Fee Credits and Appealing Stormwater Fee
Determinations

TO: City Council, all members, and Council Solicitor

FROM: Michael Alkhal, P.E., Director of Public Works/City Engineer

DATE: 02/11/2021

At the December 15, 2020 meeting, Council adopted Article 929, Stormwater Collection and Management User Fee, to allow for an adequate, sustainable source of revenue for stormwater management to protect the general health, safety, and welfare of the residents of the City of Bethlehem. These funds will be used to address our current and growing stormwater management responsibilities that include local flooding and stream health, along with significantly expanding State and Federal permit requirements. Article 929 referenced a Stormwater Management Program Credit Policy Manual that would set procedures for possible fee reductions and a fee appeal process.

The Administration requests City Council's approval of the following new Ordinance "Determination of Stormwater User Fee Credits and Appealing Stormwater Fee Determinations". A copy of the proposed Ordinance is attached along with the Credit and Appeal Manual for Stormwater Fees to be made available to all affected property owners. This document is a guide of the process for property owners seeking to appeal their Stormwater Fee if they believe an error has been made, and an explanation of the process for potential credits that could be applied to their Stormwater Fee if appropriate conditions are met. The ordinance has been reviewed by our Law Bureau and we respectfully request that the first reading of the Ordinance be held at the February 16, 2021 City Council meeting. The Stormwater Fee is currently in effect and the Credit and Appeal Policy are important components of the program.

If you have any further questions, please do not hesitate to contact me.

Credit and Appeal Manual for Stormwater Fees

BILL NO. ____-2021

ORDINANCE 2021-__

AN ORDINANCE OF THE CITY OF BETHLEHEM, COUNTIES OF LEHIGH AND NORTHAMPTON, PENNSYLVANIA, ADOPTING POLICIES AND REGULATIONS FOR THE DETERMINATION OF STORMWATER USER FEE CREDITS AND FOR APPEALING STORMWATER USER FEE DETERMINATIONS

ARTICLE 929A

**DETERMINATION OF STORMWATER USER FEE CREDITS
AND APPEALING STORMWATER FEE DETERMINATIONS**

- 929A.01 SHORT TITLE
- 929A.02 STATEMENT OF FINDINGS
- 929A.03 PURPOSE AND POLICY
- 929A.04 DEFINITIONS AND USAGE
- 929A.05 STORMWATER USER FEE CREDITS
- 929A.06 APPROVAL OF OWNER CREDITS AND RENEWAL
- 929A.07 APPEAL PROCESS AND PROCEDURE
- 929A.08 ACCOUNT ADJUSTMENTS FOR SUCCESSFUL APPEALS
- 929A.09 POLICIES AND PROCEDURES
- 929A.10 NO WAIVER OF LIABILITY BY CITY
- 929A.11 REPEALER
- 929A.12 SEVERABILITY
- 929A.13 EFFECTIVE DATE

929A.01 SHORT TITLE

This Ordinance shall be known and may be cited as the “City of Bethlehem Determination of Stormwater User Fee Credits and Appealing Stormwater Fee Determinations Ordinance.”

929A.02 STATEMENT OF FINDINGS

- A. The findings in the Statement of Findings in Article 929.02 are adopted and incorporated by reference as if fully set forth herein.
- B. The City of Bethlehem Department of Public Works has developed a Manual (hereafter, the “Manual”) titled “Credit and Appeal Manual for Stormwater Fees”, dated February 5, 2021, specifically intended for adoption under Article 929.09. The findings set forth in the manual are adopted and incorporated by reference as if fully set forth herein.

929A.03 PURPOSE AND POLICY

- A. The statement of Purpose and Policy in Article 929.03 is adopted and incorporated by reference as if fully set forth herein.
- B. The purpose of this ordinance is to adopt a system for determining and reviewing Stormwater User Fee Credits intended under Article 929.09(A) which states:

The City Council shall adopt by ordinance a Stormwater Management Program Credit Policy Manual for reductions in the stormwater User Fee in recognition of practices that are targeted to reduce the cost of the City's stormwater management program.

929A.04 DEFINITIONS AND USAGE

Unless a provision explicitly states otherwise, the terms and phrases used in this Article shall have the meanings as defined under Article 929.04, supplemented as follows:

- A. **Manual** – the Manual issued by the City of Bethlehem Department of Public Works titled “Credit and Appeal Manual for Stormwater Fees” dated February 5, 2021.
- B. **Owner** – in addition to the meaning of Owner under Article 929, shall also mean the stormwater structure owner applying for or granted approval of Stormwater User Fee Credits under this Article 929A.
- C. **Stormwater Management Structure** or **Structure** – a stormwater management structure qualifying under standards in the Manual and under the Pennsylvania Stormwater Best Management Practices (BMP) Manual.
- D. **Stormwater User Fee Credit** – the amount applied to reduce the annual Stormwater User Fee and calculated in accordance with this ordinance.
- E. **Utility Fee** – for purposes of interpreting and enforcing Article 929 and this Article 929A, “Utility Fee” as referenced in the Manual and “User Fee” are deemed synonymous.

929A.05 STORMWATER USER FEE CREDITS

- A. The City will provide a Stormwater User Fee Credit for a stormwater management structure if the Director determines it is a qualifying stormwater management structure, that it meets the requirements in the applicable Credit Eligibility Table and meets any additional requirements established by the Director in accordance with authority under this ordinance.

- B. The Credit Eligibility Tables set forth within the Manual, pages 6-7, are adopted and incorporated by reference as if fully set forth herein.
- C. The Director may reduce or revoke credits which no longer meet eligibility or renewal requirements. Owners shall be given notice with the right of appeal in the manner specified under this ordinance.

929A.06 APPROVAL OF OWNER CREDITS AND RENEWAL

- A. A Credit Application Form must be submitted to the City by the Owner or operator of the structure, or his/her legal agent. The Application shall be submitted no later than September First (1st) to apply to the following fiscal year's user fees. The date of submission shall be the date a complete Application is received by the Department. Separate forms may be needed when there are multiple structures that are eligible for different credit levels. The Application must be approved by the City's Department of Public Works to receive credit. Once an Application is approved, it will be applied to the next full billing period. Credits will be retroactively applied to previous billing periods for 2021 only.
- B. The Credit Application Checklist in the Manual, page 10, is adopted as a requirement of a complete Application, and incorporated by reference as if fully set forth herein. The Director nevertheless retains full discretion to decide whether an Application is complete.
- C. Credits renew conditionally on an annual basis provided that the Owner or operator complies with all requirements of the Maintenance Agreement required under the Manual. An Owner or operator shall comply within ten (10) days of City's request for additional information relevant to credit eligibility as a condition to such annual renewal or to continue approved credit.
- D. An Owner or operator shall permit the City to inspect the property or structure upon ten (10) days advance notice to the Owner or operator to verify existence and functionality of the stormwater management structures or best practices. If the inspection results in a determination of non-compliance or performance with the terms of the credit, such owner will be provided thirty (30) days to make corrections or improvements needed to maintain the credits; or additional reasonable time may be granted if the Director agrees cause is shown. The property Owner or structure owner shall permit inspection by the Director of corrections or improvements. If deficiencies are not corrected, the Director may revoke the related credits. Owner's or operator's compliance with a request by City to inspect is also deemed a condition to the next renewal of annual credits.

929A.07 APPEAL PROCESS AND PROCEDURE

- A. An Owner may appeal a credit determination if the Owner believes there has been:

1. an error in the mathematical calculation of credit or credits
 2. an error in Stormwater Management Structure certification
 3. an error in reduction or revocation of Stormwater User Fee Credit(s)
 4. an error in billing
- B. An appeal shall be filed in accordance with and subject to the provisions of Article 929.11 which is adopted and incorporated by reference as if fully set forth herein, in the manner of an appeal from a Stormwater User Fee determination.
- C. Appeals to the Director under both this Article 929A and Article 929 shall be filed using the form provided in the Manual, or as replaced or modified by the Director. There is no appeal filing fee. The completed appeal form and supporting documents shall be submitted to:

Department of Public Works
City of Bethlehem
10 E. Church Street
Bethlehem, PA 18018

or:

stormwaterfee@bethlehem-pa.gov

929A.08 ACCOUNT ADJUSTMENTS FOR SUCCESSFUL APPEALS

- A. The City will correct the billing information for those appeals that are determined to require an adjustment to the bill. The property owner's bill will be adjusted the following month based on the amount determined through the appeal.
- B. Successful appeal applicants will be reimbursed overpaid User Fees in the form of a credit in subsequent bills.

929A.09 POLICIES AND PROCEDURES

- A. Bethlehem City Council may by resolution or ordinance adopt and amend such policies and procedures it deems appropriate to the application for, determination, denial, revocation, and the review thereof, of Credits authorized under this article. This power is not to be regarded to exclude the Director's authority and discretion granted in paragraph B to facilitate fair, reasonable and consistent interpretation and enforcement of the credit system.

- B. The Director is delegated with authority and discretion to establish and implement additional procedures and requirements, and to interpret and enforce this ordinance, when and as deemed by the Director to be reasonable and consistent with its express provisions and policies, and to implement its purposes. Such procedures and requirements shall be available in writing and electronic form from the Department promptly upon request of an Owner and also shall be published on the Department's website with the Manual and other postings providing information, guidance and forms on the City's Stormwater Management Program.
- C. In the event of a conflict between the provisions of the Manual and Article 929 or this Article 929A, the applicable ordinance provision shall prevail.

929A.10 NO WAIVER OF LIABILITY BY CITY

Floods from stormwater may occur occasionally that exceed the capacity of the Stormwater Management System maintained and financed with User Fees. Nothing in this ordinance shall be deemed to imply that properties subject to charges shall always be free from flooding or flood damage, or that all flood control projects to control stormwater can provide complete protection from all flood and storm events. Nothing whatsoever in this ordinance shall deem City liable for any damages incurred from stormwater or from adverse water quality or establish a standard of care for stormwater management. Nothing in this ordinance purports to reduce the need or necessity for an Owner to secure property flood insurance. City does not expressly waive any immunity or defense to liability by enacting or enforcing this ordinance; and City expressly reserves the right to assert all available immunities, defenses and limitations of action in any action seeking monetary damages from City, its officers, employees and agents arising out of any alleged failure or breach of duty with respect to City's Stormwater Management System.

929A.11 REPEALER

Any and all previous Ordinance(s) or parts thereof which are inconsistent with the terms and provisions of this Ordinance are hereby repealed.

929A.12 SEVERABILITY

If any section, subsection, sentence, clause, phrase, provision, or portion of this Ordinance is found to be invalid or unconstitutional by any court of competent jurisdiction, such portion shall be deemed a separate, distinct, and independent provision. Such decision shall not affect the validity of the remaining portions of this Ordinance.

929A.13 EFFECTIVE DATE

This Ordinance shall become effective upon passage by City Council, approval by the Mayor and the passage of twenty (20) days as required by 53 P.S. § 41608(b), and shall be carried on the next most appropriate utility bill for monthly or quarterly billing of the fees due.

Why manage stormwater?

The City is subject to a permit under the Pennsylvania Clean Streams Law and the federal Clean Water Act that regulates Bethlehem's storm drainage system. This permit, known as a Municipal Separate Storm Sewer System (MS4) permit, imposes specific mandates on the City for preventing new pollution and reducing pollution from existing sources.

Stormwater is rain and melted snow that "runs off" the land. In natural, undeveloped areas, soil absorbs and filters most of the stormwater in a process called infiltration. The water that runs off the land in Bethlehem flows to the Monocacy Creek, Nancy Run, Saucon Creek, and the Lehigh River.

During development, natural areas are replaced with roofs, driveways, sidewalks, and streets. These hard surfaces, called impervious surfaces, do not allow water to penetrate them and increase the volume and velocity of stormwater runoff. Stormwater runoff carries fertilizers, sediment, oil, grease, heavy metals, trash, and anything else deposited on impervious surfaces directly into the City's storm drain system and natural stream systems. This can cause:

- Erosion of streams and decreased water quality;
- Contamination of downstream water quality and drinking water supplies; and,
- Flooding, property damage, and damage to public storm drains.

The City of Bethlehem is taking action to clean up our community's polluted stormwater runoff and to make necessary investments in our aging stormwater infrastructure. Many of the City's pipes are over 100 years old! This will not only help to improve water quality and our environment for future generations, but also help protect residents and private property from damage due to flooding.

Did you know that Bethlehem...

- **Maintains over 50 miles of pipe and channels, 3,000 inlets, 205 outfalls, and 1,650 manholes?**

Much of the City's stormwater system was installed prior to modern codes and design standards. As a result, large parts of the system are deteriorating, under-sized, and don't meet today's needs.

- **Sweeps 290 miles of streets?**

Sweeping removes pollutants such as grit and trash that would otherwise flow to the creeks, streams, and river, helping to protect water quality.

Is required by state and federal law to reduce stormwater pollution and improve the quality of our local streams?

Stormwater Utility Fee

The City of Bethlehem has been working diligently to develop solutions to our water quality and flood control challenges. After considering different options, like many other communities the City chose to implement a stormwater utility fee. A stormwater utility fee is a charge based on the amount of impervious area on a property.

This approach has several advantages. First, it fairly distributes the cost of the City's stormwater services since the amount of impervious area is related to the amount of stormwater that must be managed and all property owners directly benefit from a well maintained and regulated drainage management system. This concept is similar to measuring usage and calculating fees for drinking water and sanitary sewer services. Second, the amount of the fee must be linked to demonstrated need for publicly provided stormwater management services addressing flood abatement, water quality protection, infrastructure operation and maintenance, and regulatory compliance. All revenue is deposited into a special fund that can only be used for stormwater management.

How is the fee calculated?

Since a stormwater utility is a fee for service, all properties are charged regardless of their tax status. In Bethlehem, properties are charged in increments of 2,101 square feet (SF), the average impervious area of a residential property. These are called "billing units". All single family detached residential parcels are charged as one billing unit. All non-single family residential and commercial properties are charged based on the billing units within the parcel. Fractions are rounded to the nearest whole number. For example, the property below results in thirty-three (33) billing units. The number of billing units is then multiplied by the rate adopted by the City Council.

Sample Property	Factor	Calculation
	Impervious Area	70,336 Square Feet
	Billing Unit	2,101 Square Feet
	Number of Billing Units on Property	$70,336 \div 2,101 = 33.48$
	Natural Rounding	33 Billing Units
	User Fee	33 Billing Units $\times$ Rate Set by City Council

A property with less than 500 SF of impervious area is considered undeveloped and therefore not assessed a fee.

Can I reduce my bill?

Yes! Another advantage of a stormwater utility fee approach is that it allows the City to provide “credits” to property owners who have implemented practices that reduce the impact of stormwater on the publicly-managed system and local water ways.

Bethlehem property owners can reduce their fee in two ways:

[1] Reduce your impervious area.

Property owners can remove un-needed impervious area. If the removal of impervious area results in fewer billing units, there is a reduction in the total fee charged. The City’s Department of Public Works is happy to work with any property owner to assess whether a planned reduction will result in a lower fee.

[2] Take credit for a stormwater management structure on your property.

The City will provide credit to property owners who operate and maintain qualifying stormwater management structures. These private structures help the City by reducing the cost of managing the public system. Typical facilities include dry ponds, wet ponds and wetlands, bioretention, bioswales and filter strips, permeable pavers, and green roofs.

This manual provides a step-by-step process for determining whether your stormwater structure qualifies for credit.

A stormwater structure, such as the bioretention facility above, may qualify a property owner for a credit on the stormwater utility fee.

Credit Policy

The City will provide a stormwater utility fee credit for any stormwater management structure if it meets the requirements in the Credit Eligibility Table:

Credit Eligibility Table for Post Construction Structures

Component	Requirement
Technical Standards	● Condition of Development The structure is designed, installed, and accepted by the City in accordance with the current version of the Pennsylvania Stormwater Best Management Practices (BMP) Manual.
Maintenance Agreement	● As a condition for a new or renewed credit, the City may require a maintenance agreement or an existing maintenance agreement to be updated to meet current standards for maintenance and inspection.
Function Verification	● The structure must be functioning as designed. ● This requirement is satisfied if the structure has previously been accepted by the City, has passed its most recent inspection, and is compliant with any reporting requirements contained in the maintenance agreement. ● If the above conditions have not been met, this requirement is satisfied if a professional engineer or other professional recognized by the City certifies that the structure is operating as designed. ● If the structure fails a City inspection, or the owner fails to submit documents as required in the maintenance agreement, the City will revoke the credit if corrective actions are not taken within the time specified by the City.

How much credit can I get?

The City's credit system accounts for the fact that different structures provide different levels of benefit and encourages redevelopment of existing impervious areas. Some structures provide only quality or flood control, while others provide both. Some structures provide higher levels of pollutant reduction than others. The credit system also accounts for low-income households. The following credit amounts will be applied to an eligible stormwater management structure or low-income households.

Credit Amount Table for Post Construction Structures

Required		Design Standard	Credit
Condition of Development	Control of New & Existing Impervious Cover	Current version of the Pennsylvania Stormwater BMP Manual	up to 50%*
	Control of New & Existing Impervious Cover under an approved PA Act 2 Program	Current version of the Pennsylvania Stormwater BMP Manual	50%+*, may be greater with Public Works Director approval
* The overall site credit will be based on the impervious area being managed by BMPs, Impervious area not managed by BMPs that meet the PADEP BMP standards will not receive credit.			

Credit Amount Table for Low-Income Households

Criteria	Credit
Household income below 150% of the <i>'Health and Human Services Poverty Guidelines for the 48 Contiguous States'</i> effective at the time of application & less than 1,500 square feet of impervious cover.	50% of the rate adopted by the City Council that is applied for annually. ¹

Common Questions

- **Does the credit apply to the entire property?** No, the credit only applies to the impervious area draining to the structure, not the entire property.
- **Can I take credit for impervious area from another property?** Yes, but only if the area is not subsequently treated by a structure on the contributing property. However, the credit taken by a property owner may not exceed 50% of the total stormwater utility fee for the property.
- **What about structures that are maintained by a homeowner's association?** These structures must meet the BMP requirements discussed later in this manual (see page 9).
- **What if my structure exceeded the design standard in place at the time of development?** Most structures were designed to meet the overall requirements for the property at the time of development. The City will consider exceptions on a case-by-case basis if the overall New & Existing Impervious is covered under the PA Act 2 Program.
- **Why can't I get 100% credit on my stormwater bill?** The City's stormwater program is designed to be comprehensive and includes public services such as system cleaning, rehabilitation, replacement of the storm drainage system, and regulatory compliance. All

¹ A limited number of Low-Income Household Credits will be approved by the city based on a first come first serve basis.

properties receive a benefit from the overall program and therefore contribute to the funding needed for stormwater management.

Post Construction Stormwater Structures serving homeowner associations.

A stormwater management structure may be operated and maintained by a homeowner association (HOA) on behalf of its members. **In these cases, the credit applicant is the association, not the individual property owners.** This is because some properties that belong to the association pay for maintenance of the structure but may not actually drain to the structure. Conversely, some properties that drain to the structure may not belong to the association.

HOAs should contact the Department of Public Works for more information prior to submitting a credit application.

Separate Billing and Consolidated Credit

The credit for the stormwater structure(s) is analyzed as if the HOA was a single property. When submitting an application, the association enters the total impervious area within the association boundary draining to the structure. The resulting credit is provided to the association. It is then up to the association, on behalf of its members, to determine how to distribute the credit among property owners (direct payment, reduction in HOA fees, deposit into a structure maintenance fund, etc.).

How and when do I apply?

A Credit Application Form must be submitted to the City by the operator of the structure, or his/her legal agent, and approved by the City's Department of Public Works to receive credit no later than September 1 for the following fiscal year user fees. Separate forms may be needed when there are multiple structures that are eligible for different credit levels. Once an application is approved, it will be applied to the next full billing period. Credits will be retroactively applied to previous billing periods for 2021 only.

Credit Application Checklist

Documentation	Description
Credit Application Form	This form is located under Forms at the end of this manual.
Structure Certification Form	This form is required ONLY if the structure has not been approved by the City and accepted into the City's inspection program. The form is completed under the authority of a professional engineer or other qualified professional. The form must include certification that the structure is functioning as originally designed.
The following must be submitted on request if not on-file with the City:	
Drainage Area Map	Provide a to-scale map showing property lines, impervious areas, stormwater drainage area boundaries, and the total impervious cover draining to the structure(s).
Structure Design Plan/As-Built Drawing	Provide the design plan and as-built drawing for the structure(s).
Maintenance Agreement	Provide a copy of the agreement that allows the City access to the site and establishes enforceable maintenance and reporting requirements. An updated maintenance agreement may be required as a condition of receiving credit.

Do I need to re-apply for credit?

At the discretion of the City, credit will continue to renew on an annual basis provided that the operator complies with all requirements of the maintenance agreement. The City reserves the right to change the criteria for receiving credit or require additional information for the operator of the structure to continue receiving credit.

The City will periodically inspect properties to verify functionality of the structures or best practices. If the inspection results in a determination of non-compliance or performance with the terms of the credit, the property owner will be provided time to make corrections/improvements. If such deficiencies are not corrected, the credit will be revoked.

Appeals Policy

Property owners may appeal their stormwater utility fee only when addressing errors in billing and /or calculation. The appeals process is outlined below.

Eligibility

Property owners have grounds for appeal if:

- The parcel in question is a public right-of-way
- The property is exempt because it is railway or associated ballast
- There is a mathematical error in calculating the stormwater fee
- The identity of the property owner is incorrect on the invoice, or
- An approved credit was applied incorrectly

Application Submission

Property owners must submit an appeals application to the City Public Works Director using the form provided in this manual. There is no application fee. The completed application and supporting documents must be submitted to:

Department of Public Works
City of Bethlehem
10 E. Church Street
Bethlehem, PA 18018

or:

Stormwaterfee@bethlehem-pa.gov

Appeal Determinations

- The property owner must submit an appeal within 30 days of the charge being mailed.
- A hearing officer will review the application for completeness, and if it is not complete, will notify the applicant within 15 days of submittal.
 - If the application is not complete, the applicant will have an additional 30 days to resubmit.

- Once the application is determined to be complete, the appeals officer will respond to the property owner within 30 days.
- If the hearing officer's decision is not in favor of the applicant, the applicant may further appeal to the Director of Public Works within 30 days of the response's receipt.
 - The Director's decision will be returned to the applicant within 30 days of the appeal's receipt.
- If the applicant is further aggrieved by the director's decision, then they may appeal to the appropriate County Court of Common Pleas within 30 days of the receipt of the Director's decision.
- If payment of the bill is not made within 15 days after the expiration of the property owner's right to appeal, the unpaid fee will be considered delinquent.

Billing Error Corrections and Payment Correction Appeal Determinations

The City will correct the billing information for those appeals that are determined to require an adjustment to the bill. The property owner's bill will be adjusted the following month based on the amount determined through the appeal.

Administration of Appeals

Successful appeal applicants will be reimbursed in the form of a credit in subsequent bills.

Reason for Credit: ☐ Stormwater Facility/BMP ☐ Low Income

If applying for credit due to low income, skip to 'Low Income Household Credit' section.

Homeowner Association Information:

Is the structure operated by a homeowner association?

☐ Yes ☐ No

Facility Information:

Leave blank if information is unknown.

Facility Type

Year of Installation

Was this facility constructed as a condition of development? Yes ☐ No ☐

If structure was a condition of development, was the facility designed to control new impervious cover, existing impervious cover, or a combination of both?

New Impervious Cover ☐

Existing Impervious Cover ☐

Both New and Existing Impervious Cover ☐

Impervious Area Treated:

New Impervious Area Treated SF

Existing Impervious Area Treated SF

Total Impervious Area Treated SF

Low Income Household Credit*:

Gross Household Income:

Number of Persons in Household:

Impervious Cover on Property Less than 1500 Square Feet? Yes ☐ No ☐

* To qualify for credit household income must be below 150% of the 'Health and Human Services Poverty Guidelines for the 48 Contiguous States' effective at the time of application & the property must have less than 1,500 square feet of impervious cover.

Additional Information:

Please include additional information if necessary either in the box below or as a separate attachment:

The following supporting documentation may be required if it is not already on-file with the City. City staff will contact the applicant if the information is needed.

- **Drainage Area Map** – A to-scale map showing property lines, impervious areas, stormwater drainage area boundaries, and the total impervious cover draining to the structure(s).
- **Structure Design Plan/As-Built Drawing** – A design plan and as-built drawing for the structure(s).
- **Maintenance Agreement** – A copy of the agreement that allows the City access to the site and establishes enforceable maintenance and reporting requirements. An updated maintenance agreement may be required as a condition of receiving credit.

Certification and Inspection Agreement

- ☐ I am the legal operator or I am duly authorized to act on behalf of the legal operator, I have reviewed the information contained in this application and the supporting documentation, and to the best of my knowledge believe that it is true and accurate.
- ☐ I commit to maintaining the stormwater management structure in good working condition.
- ☐ I authorize the City or its representative to enter the site for the sole purpose of visually inspecting the stormwater management structure.
- ☐ I understand that if an inspection by the City indicates that the structure is not properly maintained, that the structure will no longer be eligible for credit if deficiencies are not corrected within the timeframe provided by City staff.
