BUREAU DETAIL

Bureau: Financial Services

No: 0203

Department: Administration

No: 0020

Bureau Description:

This bureau performs all activities necessary to ensure proper accounting for and financial reporting of all City funds. Major activities include posting the books of account and the preparation of interim and annual financial reports in addition to a variety of special purpose reports. This bureau also disburses City funds through the Accounts Payable system.

Goals and Objectives:

- Examine all opportunities that are offered by TD bank that will make our daily tasks more efficient and enable us to focus on more value-added activities. (Lockbox Retail Services, TD Presentment and Payment Services)
 - Adapt current processes to the anticipated software upgrade.
 - Analyze the financial profitability of the various activities offered by the Golf Enterprise.
 - To prudently manage the City's cash flow issues faced during the fiscal year (especially the last six months of the year). Chart projected monthly financial activity in order to help others understand the challenges that are faced when trying to meet payrolls, pension obligations, and debt service payments. Encourage ownership attitude among City employees when evaluating performances of the individual City enterprises.
-

Prior Year Achievements:

- Formed new banking relationship with TD bank which created a net savings of \$94,000. The savings is comprised of \$65,000 of interest income (across all funds) and reduction bank fees of \$29,000. TD Bank offers a variety of services that will benefit both the City and its citizens. During the selection process, we reviewed current status of our banking needs and adjusted for the future.
 - Assisted the Parks Department with the implementation of the Parks and Recreation software. The new software provided customers with more convenient ways to make payments to the City.
 - Continued to work with the Purchasing Council to update electronic PO process. The streamlining of the current ordering, receiving, and payment process will create savings for the City financially. In addition, a data base will be generated that can be used when making decisions about future purchases.
 - Reclaimed audit calculations that were processed by the Controller's Office in the past due to limited number of accounting professionals in Financial Services.
 - Provided current employees with educational opportunities so they can meet the demands of ever changing technology.

BUREAU DETAIL

Bureau: Urban Forestry

No: 050301

Department: Public Works

No: 0050

Bureau Description:

This bureau manages all urban forestry activities including monitoring, promoting, conducting, permitting, and overseeing all urban forestry functions within the right-of way in accordance with the City's shade tree ordinance (Article 910). The bureau also reviews all land development plans and ensures compliance with the City's SALDO and Zoning ordinances pertaining to landscaping. In addition, Urban Forestry manages and supports work with other departments and bureaus on forestry related matters, special programs, community outreach, education, and greening initiatives and collaborates with community associations, government agencies, and volunteer groups to build and maintain a sustainable and attractive community.

Goals and Objectives:

- Manage and maintains the urban forest to include: the review of land development plans for adherence to SALDO and Zoning ordinances, investigation of citizen concerns, oversight of pruning, removal, planting, and treatment activities on public property, testing, licensing, and monitoring of tree contractors.
- Continue to work with Planning Bureau on SALDO revisions pertaining to landscaping and review the new Zoning Ordinance for inconsistencies related to Urban Forestry requirements.
- Develop additional city standard details related to Urban Forestry, such as tree well dimensions and recommendations for a variety of right-of-way sizes and conditions.
- Continue working with other bureaus and departments to improve processes and procedures for management of tree-related issues and resolve problems such as tree/sidewalk conflicts.
- Seek improvements for bureau related activities, such as permitting, licensing, nuisance abatement notifications, tree replacement, landscape plan reviews, and the tree inventory.
- Reach out to community groups and schools to increase community involvement and interest in Bethlehem's urban forest.

Prior Year Achievements:

- Fulfilled the requirements to maintain, for the 22nd year, Bethlehem's Tree City USA status. Also qualified for a Tree City USA Growth Award for the 7th consecutive year in recognition of environmental improvement and achievements in education and public relations, partnerships, planning and management, and tree planting and maintenance.
 - Encouraged community interest in forestry through an Arbor Day celebration at Governor Wolf Elementary School.
 - Enlisted the help of local licensed tree contractor and ISA Certified Arborist Joshua Malik of Joshua Tree to demonstrate safe, proper tree-climbing techniques to students and teachers at Arbor Day. Joshua Tree again provided two (2) climbing stations with additional personnel and equipment. This has increased the number of schools we can target for the celebration by handling a larger number of students in the time designated for the activity.
 - Completed CEU's to maintain Arborist Certification with the International Society of Arboriculture.
 - Completed credits to maintain Pesticide Applicator Certification with the Pennsylvania Department of Agriculture.
 - Attended the 50th Annual Penn-Del Shade Tree Symposium for continuing education and industry updates.
 - Finalizing informational forestry brochures for distribution to the public. One to offer a condensed version of the shade tree rules and regulations and one (1) related to correct tree replacement selection and planting.
 - Revised the tree permit application form and included it on the City's website. The new form is modeled after the Engineering Bureau permit form for departmental consistency and to make it clearer and more concise for property owners, contractors, and city employees. Included with the new permit application is a general set of rules explaining requirements such as when a licensed contractor is required.
 - Implemented the use of the Code Enforcement application within Community Plus to improve permitting, licensing, nuisance abatement notifications, complaints, inspections, and citations. This implementation provides a more consistent, comprehensive, and effective system for data entry, record keeping, correspondence, property history, etc. to expedite, document, and resolve departmental issues.
 - Researched, updated and expanded the list of approved street trees and reformatted the documentation on the City's website as a downloadable PDF for property owners' convenience.

BUDGET REFLECTS ACTUAL AMOUNT SPENT IN 2015 AND ANTICIPATED COST OF PARTS AND SERVICES IN 2016. BUREAU CONTINUES TO DO AN OUTSTANDING JOB IN KEEPING COSTS DOWN BY TAKING ON MORE IN-HOUSE REPAIRS. WE CONTINUE TO MAKE ALL EFFORTS TO IMPROVE EFFICIENCY AND REDUCE COSTS WHILE MAINTAINING OUR FLEET IN SERVICEABLE ORDER. PAST SURVEYS/EVALUATIONS REVEALED THAT OUR BUREAU MAINTAINS THE CITY'S FLEET AT SIGNIFICANTLY LOWER PER UNIT COST ANNUALLY VERSUS NUMEROUS OTHER CITY FLEETS IN PENNSYLVANIA. NEED TO BE COGNIZANT OF THE FACT THAT THE AVERAGE AGE OF UNITS IN OUR FLEET IS ELEVEN (11) YEARS. THIS AVERAGE GETS OLDER EACH YEAR AS WE DO NOT PURCHASE ENOUGH VEHICLES EACH YEAR TO SUSTAIN IT. OLDER HIGHER MILEAGE VEHICLES WILL COST MORE TO REPAIR AND MAINTAIN. INCREASED DUE TO INCREASE IN REPAIRS AND COSTS OF REPAIRS AND ADDITIONS TO THE FLEET. THIS ACCOUNT ALSO ALLOWS US TO DO MORE EXTENSIVE REPAIRS/REBUILDS IN-HOUSE, SAVE ON OUTSOURCING, AND REDUCES MORE EXPENSIVE VEHICLE REPLACEMENT COSTS.

BUREAU DETAIL

Bureau: Electrical Maintenance No: 0505

Department: Public Works

No: 0050

Bureau Description:

This bureau provides for the management, permitting, and maintenance of the City's street and traffic signal lights. This bureau also provides electrical support to special events, safety communication system maintenance, and electrical support to all public buildings, in-house projects, and recreational facilities.

Goals and Objectives:

- Monitor and evaluate the savings of the LED Street Lighting Project. Plan is to eventually take over all of the street lighting maintenance so we do not have to use an outside contractor. Better manage and maintain the City's street lighting system, traffic/transportation signal system, communications, electronics systems and develop and more detailed documentation on all Electrical Bureau operations to increase efficiency and reduce city project cost by performing the electrical installations in house.
 - Provide electrical support to the various festivals and events in the City. Refine the Christmas lighting decorations to be concentrated on the downtown core and maintain the electrical support to the various City buildings, projects and facilities.
 - Continue the program started in 2013 to cross train all bureau staff to enable the bureau and to give better coverage on a daily basis for our traffic signal system, telephone system, radio system, and street lighting systems.
 - Provide a timely service, clean up the safety and appearance of City facilities including the electrical and data systems. Implement standards for the installation of the voice and data network equipment and cabling including fiber optic pathways. We have developed the product, installation and testing standardization document in 2012.
 - Maintain/support our trunking radio emergency/911 communication system.
 - Install GPS time keepers and IP controllers in the traffic signal cabinets to keep accurate time and enhance the time base operation and coordination of these signals.
-

Prior Year Achievements:

- Prepared and went to contract to upgrade the radio system to the new software release along with the replacement of two (2) failed microware systems in 2015.
 - Monitored and reviewed costs savings for LED street lights and traffic signal lamp installation projects and citywide street light acquisition project.
 - Provided technical support and design of the new voice over IP phone system including design, installation and management while working daily with the provider to implement the system by the end of 2015.
 - Provided training for staff on traffic signal programming with laptop and backed up all traffic signal controllers' data that the City owns. Provided factory training on installation of the voice and data products to provide a higher quality installation for the voice and data networks. Received certification for five (5) employees as Traffic Signal Technician, one (1) IMSA certified.
 - Reviewed lighting for numerous developments and permits for traffic signal lights.
 - Continued to improve the City's Christmas lighting decorations utilizing artificial trees, new power sources and new LED star decorations for the south side. Installed, as part of the streetscape improvement project, new power feed points and music system on Main Street. Installed and developed the new layout for the Christmas decorations and music on Main Street to reduce cost and enhance the quality of the appearance. Installed 17 new LED stars on 4th street and plan to replace the halos on 3rd Street with the LED stars in 2016 to keep the decorations consistent on both 3rd and 4th Streets.
 - Completed the conversion of our 5,841 cobra head street lights to LEDs with smart technology to communicate back to the City in case of a failure. This reduces the cost of operation and continually updates our GIS data. The street lighting pole layer has been installed into the City's GIS System.
 - Started working with Penn DOT to develop new traffic signal timing throughout the City using our "Synchro" program model.
 - Continue to install new police surveillance cameras in many parks, neighborhoods, and public parking garages throughout the City to reduce police response time and provide early detection of any criminal activity to increase safety for the citizens of Bethlehem.

BUREAU DETAIL

Bureau: Police

No: 0601

Department: Police

No: 0060

Bureau Description:

The Bethlehem Police Department is a 24 hour a day, seven day a week city service that includes Patrol, Investigation, Supervisory and Management functions. The Department provides the City with day to day police services. The Police Department is structured using a Community Police philosophy and is committed to community and police partnerships. The Police Department serves a resident population of approximately 75,000 to 80,000 people, plus a Casino Complex, multiple Industrial Parks and Universities, which add an estimated additional population of approximately 20,000 people.

Goals and Objectives:

- Continuation of the Beat Cop Program on the north side and south side of the City in business districts and continued implementation of our joint partnership program with Lehigh University on the south side which includes the Bethlehem-Lehigh Bike Patrol, additional cameras in strategic areas of the south side, working with the Ambassador Program, etc.
- Continue to move forward with Community Policing efforts throughout the City and improve police-community interactions through Programs like “Kops and Kids,” public meetings and events, personal interactions with community groups of all types and religions.
- Addition of a third K-9 (Police Dog and handler). Currently in the process of looking at financial aspects of this to ascertain total costs associated with this addition.
- Enlargement of the Mounted Unit. Adding an additional Mounted Officer and a horse, enabling us to deploy (2) two man Mounted Units to two separate locations anywhere in the City. This will enlarge our range of operation and also scheduling. Thru Friends of the Bethlehem Mounted Police Unit, we will be on our way to a new updated facility for the Police Horses at no expense to Bethlehem taxpayers. This gives us the ability to also consider, once the Mounted facility is complete and up and running, adding a City Kennel facility area on the side of it to bring the City fully in line with current State Dog Laws for third class Cities.
- Continue to reduce Officers on lite duty due to injury, getting them treated and back to work in a reasonable amount of time, fair to them and City. In March 2015 we enacted a lite duty directive, approved by the FOP. This sets up a protocol for lite duty officers to follow to come back to full duty.
- Continue our process in acquiring the Wilson Kramer Armeey Reserve Training Facility, working in cooperation and partnership with Lehigh County Emergency Management and Northampton County Emergency Management, City of Allentown, and Bethlehem Fire, EMS and 911 Center. Presently, under an MOU, usage plans of this facility as the Lehigh Valley Regional Emergency Management Operation Center along with the City of Bethlehem Public Safety Training Center, are being planned.

Prior Year Achievements:

- In 2015, we added additional security cameras through a Northampton County Gaming Grant to the Fourth Street Corridor and Business area of the south side. This grant was part of our continued joint partnership with Lehigh University and the Lehigh Police Department relative to public safety issues on the south side.
 - The re-introduction of the Junior Police Academy Program by our SROs for teenagers in June 2015, the “Coats for Kids” Program they promote when the weather turns cold, and other during and after school activities. The SRO Program has been very successful with students, parents and school staff.
 - In 2015, we started a major initiative of joint and cooperative policing and security awareness in the neighborhoods and south side business district as part of a Lehigh University and City partnership. This partnership includes a joint cooperative policing philosophy and the introduction of the Ambassador Program to the south side business district and the addition of new security cameras to Fourth Street business areas. Currently the City monitors 122 cameras through joint programs between the City and Lehigh and also BHA.
 - The introduction of a joint Bethlehem – Lehigh University Bike Police Officer Program in May 2015. This joint Bike Patrol covered the south side business districts, the Greenway, Artsquest area and around the Lehigh campus area. In fall of 2015, as part of this continuing initiative, Lehigh University, through the Friends of the Mounted Unit, purchased a new Police Horse for our Mounted Unit. The male Police Horse, named ASA, is presently on patrol in the City as part of our Mounted Unit.

Bureau: Utility Maintenance **No:** 2002
Division: Utility Maintenance **No:** 20022

Department: Water/Sewer Resources **No:** 0055

Division Description:

This division effectively maintains, repairs and replaces, as required, all water transmission, water distribution and sanitary sewer collection system infrastructure and potable water storage facilities. This division maintains 24/7 emergency standby for the purpose of responding to water and sewer system problems within the utilities' service territories for each respective utility, which include the following areas: all of the City of Bethlehem, Fountain Hill and Freemansburg boroughs, portions of Hanover Township in both Lehigh and Northampton Counties, portions of Bethlehem, Lower Saucon, Upper Saucon, East Allen, Allen, and Salisbury Townships.

Goals and Objectives:

- The Utility Maintenance Bureau will pilot COMMUNITY+ Work Order program to provide accountability through accurate field data collection (time, personnel/equipment costs, inventory control, task performed). This initiative was pushed back a year in order to acquire better hardware and allow for system upgrade.
- Define location of 17 air release valves and 6 air/vacuum valves along the raw water transmission mains from Blue Mountain to Water Treatment Plant.
- Utility Maintenance Bureau and the Purchasing Department will partner to research and implement a Vendor Managed Inventory system that will ease the burden of ordering material and maintain stable pricing.
- Confident use of computer technology by personnel – train new, lower level personnel and elevate knowledge base to level of crew leaders.
- Drain/inspect (2) above ground water storage tanks; replace faulty mixers.
- Provide field coordination to support contractors during planned water main replacements.

Prior Year Achievements:

- Installed 3,000+/- LF of 8" DIP water main for Rte. 412 backbone road between Lynn Ave and Shimersville Rd. (all work performed in-house).
- Installed package booster station at Weil and Ritter Sts in Salisbury Twp in order to correct a long-standing issue for our customers. (all work performed in-house).
- Installed 20" by-pass w/ altitude valve at 5MG SE storage tank in order to better utilize tank; improve water quality (all work performed in-house).
- Installed 20" by-pass at Southside Reservoir in order to be able to take 5mg SW tank out of service for inspections/rehabilitation. (all work performed in-house).
- Oversaw installation of 16 inch water main road crossings along Rte. 512 in Hanover and East Allen Townships (ahead of PennDOT roadway restoration project).
- Provided coordination during construction of the 5th and William Booster Station.
- Replaced three (3) older generation chlorine analyzers with a model that is more cost effective to operate.
- Provided input on design effort for the Southside Reservoir pump house rehabilitation.
- Installed five new valves in the water distribution system to allow for strategic control during both preventative maintenance and emergency repair activities.
- Rebuilt 16" PRV on Postal Rd which was losing 5 gpm or 2.6 mg/year.

BUREAU DETAIL

Bureau: Utility Maintenance **No:** 3002

Department: Water/Sewer Resources **No:** 0055

Bureau Description:

This division effectively maintains, repairs and replaces, as required, all water transmission, water distribution and sanitary sewer collection system infrastructure and potable water storage facilities. This division maintains 24/7 emergency standby for the purpose of responding to water and sewer system problems within the utilities' service territories for each respective utility, which include the following areas: all of the City of Bethlehem, Fountain Hill and Freemansburg boroughs, portions of Hanover Township in both Lehigh and Northampton Counties, portions of Bethlehem, Lower Saucon, Upper Saucon, East Allen, Allen, and Salisbury Townships.

Goals and Objectives:

- The Utility Maintenance Bureau will pilot COMMUNITY + Work Order program to provide accountability through accurate field data collection (time, personnel/equipment costs, inventory control) (This initiative was pushed back a year in order to acquire better hardware and allow for system upgrade.).
 - Install 100+ manhole inserts to remediate inflow and infiltration issues. (the average manhole is capable of allowing 34,560 gallons of water into the sanitary sewer system during a rain event).
 - Utilize mobile CCTV unit to inspect thirty (30) miles of the sanitary sewer collection system annually for the next 10 years.
 - Replace faulty lift pump at Langhorne Lift Station in order to provide reliable, consistent service to our customers.
-

Prior Year Achievements:

- Installed 100+ manhole inserts to remediate inflow and infiltration issues.

2016 NON-UTILITY CAPITAL IMPROVEMENT PROJECT DETAIL

PUBLIC SAFETY

911 Phone Equipment Replacement

\$621,000

Current 9-1-1 specific phone equipment is comprised of copper phone lines and circuit boards capable of handling only analog voice technology. This type of equipment and the infrastructure that supports it have been around for well over 50 years and does not support current and emerging communication technologies. New equipment will meet State NG 9-1-1 requirements and be IP based, digital, interoperable, and capable of handling advanced data such as text, video, and telemetrics.

Replacement of the 911 Radio System Microwave Links

\$210,000

This project is the replacement of the failed microwave links between the prime site on South Mountain to both the electrical back-up center and the master site at City Hall. The current microwave system is past its expected life cycle and is no longer serviceable. These microwave links are vital to public safety for the radio system operations for Police, Fire, EMS Fire Wan, Public Works, and Water Telemetry functions. There are no spare parts available to make any more repairs. Both links have currently failed and no longer in service. This is an absolute necessity to replace the links to keep the 911 Trunking Radio systems operational. The City installed 2 fiber optic T1 lines and will be evaluating the reliability as an inexpensive redundant backup to the replacement microwave links. The 911 radio system is currently operating on fiber optic T-1 links because the microwave links have completely failed on this function. There is some risk if the T-1 links get damaged or fail. The system will revert to site operation giving a reduced range and capacity until the utility can repair the fiber optic T-1 links. The failed microwaves are still being utilized for the wide area network (WAN) to extend service to fire stations and complete failure is likely within the next 3 years. Another link will have to be secured likely at \$5,000/month.

911 Radio System Software Upgrade from 7.7 to 7.14

\$920,000

The 911 Trunking Radio System is in need of a software version upgrade to stay compliant and serviceable from Motorola technical support. Since 2014, Motorola is no longer able to provide technical support on any systems that are operating on or below the 7.7 software version. The City is at risk if the software is not kept up to within five (5) release versions of the current release. Our system's software has not been upgraded in the last six (6) years. The Trunking Radio System is like a computer system running Windows XP and is completely software driven using switches, routers and servers that only have a manufactured life of about four (4) years. There is no more software support for the 7.7 version of software running the radio system. When a switch, router or server fails, the specific piece of equipment may no longer be compatible with our current software and the new version is our only option. Lack of an upgrade has a realistic possibility of diminished 911 communications at some juncture until the upgrade is implemented. The project currently is underway. Completion and the remaining funds are expected to be spent in early 2016.

Ambulance Replacement/Remount Plan

\$265,685

The plan is to replace/remount ambulances as necessary to maintain a fully operational fleet of seven (7) ambulances, minimizing breakdowns and expenses incurred from heavy usage and high mileage. The plan involves the on-going replacement or remounting from borrowings, CDBG, or other alternate funding sources. The Mechanical Bureau will determine which ambulance will need to be replaced/remounted regardless of age based on warranty information, mechanical maintenance records, and visual inspections of the fleet at the time of replacement.

CAD/RMS Replacement

\$273,000

Current system cannot keep up with the demands placed upon it. Problems are well documented and ongoing. New system will focus on proper handling of 9-1-1 call information including 9-1-1 caller information, EMS pre-arrival instructions along with EMS & Fire department reporting software. Additionally, current operating hardware which is six years old will be replaced.

Fire Apparatus Replacement Program

\$197,500

The project is to replace aged fire apparatus. The life of a piece of fire apparatus is 15 to 20 years depending on the call volume. In order to keep our apparatus within those guidelines, we must replace a piece of apparatus every other year. The fire department currently has six engines and two ladders. As the fire apparatus ages and warranties expire, it becomes more costly to maintain apparatus in an operational condition. Since 2014, initiated was a plan to start rechassisising the apparatus instead of purchasing new apparatus. This should reduce the cost of apparatus replacement by at least forty percent. In 2015/2016, we need to replace our 1997 Sutphen tower. It has already received extensive renovations. It has been out of service and unavailable to us for almost 50% of the time in the last two years.

Fire House Improvements

\$72,433

Project is to include the improvements/renovations to interior/exterior of the City's Fire Houses. City will focus on functional concerns of the aged facilities and other energy efficiency improvements. Work may include: Installing an emergency generator at Schweder Fire Station, replacing/upgrading heating/cooling ventilation systems, paving, replacement of doors/windows, renovations to and purchases of equipment for living areas.

-----------	--------

Wireless Mesh Public Safety Data and Video Network

\$17,504

This will provide funds to install wireless cameras along the Fourth Street corridor. Over the past few years, the installation of the wireless mesh camera network has proven to be very valuable to our efforts. Not only are the cameras useful in detecting criminal activity and identifying suspects, but our Communications Center is able to effectively use the cameras to feed real-time information to our emergency responders to a variety of situations. They are used to give information to Police, Fire, and EMS workers so that they have a much better response to crimes in progress, traffic accidents and fire/hazardous material incidents. This proposal will allow the installation of cameras at intersection location on Fourth Street between Brodhead Avenue and Buchanan Street. This area is very heavily traveled and currently there is no camera coverage along this route.

Public Works

3rd & 4th Street/Streetscape Improvements **\$400,000**

This project is to renew/upgrade the streetscape on selected sections of Third and Fourth Streets from Hayes Street to Wyandotte Street. The work would include repair/replacement of brick and concrete sidewalk in deficient areas, curb, street furniture, and trees. The project is to be completed in three phases which are: Phase I - Fourth Street from Hayes to Adams, Phase II - Fourth Street from Adams to Wyandotte, and Phase III – Third Street from Buchanan to Wyandotte. A TAP grant in the amount of \$400,000 was received for Phase I. Some sidewalk and curb ramp improvements have or will be completed by developers along 3rd Street. Phase I was designed in-house and will be bid in 2015 with construction likely to start in spring of 2016.

Funding Source:
Federal (Phase I) 400,000

Bridge Repair **\$188,091**

The project is for repairs of nine (9) City owned bridges. Two of our bridges are going through the design process to be replaced in the near future (Lynn Avenue and High Street). All but one of the remaining bridges is in need of significant repairs. The City receives regular inspection reports through the National Bridge Inspection System (NBIS). These reports detail needed repairs including concrete repair, deck overlay, deck and bearing rehabilitation and painting. The Public Works Department annually completes repairs that are within our expertise utilizing in-house forces. Much of the more complex work requires specialized bridge contractors. In addition, the NBIS inspections sometimes result in "Priority 1" repairs which must be addressed within a few months. Failure to make these repairs may result in further deterioration and greater future costs, as well as possible closures in extreme instances. Carryover from 2015 will be used to complete a larger project (\$120,000) at the Fire Lane Bridge in 2016.

Creek Road Culvert Replacement **\$76,350**

The Creek Road Culvert project is to replace the existing deteriorated culvert along Creek Road north of Friedensville Road. The culvert has been damaged by repeated flooding and the roadway is often overtopped during storms. In addition, the existing culvert is narrow, allowing only a single lane to cross. The replacement culvert will be sized to allow two lanes of traffic and reduce flooding of the road. The guiderail also needs to be upgraded to meet current safety standards. The culvert replacement project was bid in 2015 but the bids came in significantly above the available funding. We will complete the repairs to address the most urgent issues, including guiderail and concrete deterioration in 2015/2016, and defer the full replacement of the culvert until 2019.

This project is the continued development of the Geographic Information System (GIS) for the City. The GIS includes City infrastructure and integrated data that will enable all departments to use it for analysis, monitoring of performance and work flow improvements. The project began in 2006 and now includes over 60 layers of data for tracking and maintaining city infrastructure and public safety. The most recent phase included preliminary storm sewer database construction as well as software and hardware upgrades. Currently, we are planning the next phase of the GIS implementation. Next phase will include a public viewer enabling self-service GIS maps, field mapping applications, continued development of the infrastructure networks, training, and various workflow tools. Additional tasks for future phases are being considered.

High Street Bridge

\$953,092

Provide for the engineering and replacement of the structurally deficient wooden bridge over a former Norfolk Southern line. The bridge was closed to all traffic on 6/16/11, which combined with the previous closing of the Seidersville Road Bridge equates to the residents along Ravena Street having only one point of access to their residences: the intersection of Ravena and Fire Lane Road. Final design has been completed and we are awaiting final approvals from PennDOT. The City has successfully had the bridge placed on the TIP for construction funding to replace the structure with a new 2-lane bridge meeting current standards. This would also preserve future recreational access beneath the structure. Norfolk Southern will be responsible for a portion of the replacement costs per agreement, specifically preliminary and final design engineering efforts. The let date is currently set for October 2015 with construction expected to begin in winter and be completed in 2016, but may be moved up depending on when construction funds become available.

Linden Street Storm Sewer Upgrade/Repl.

\$215,806

Replacement of the existing stormwater system providing service to Linden Street between East Boulevard and Santee Mill Road. This system is comprised of the original CMP installed by PennDOT in conjunction with the roadway, which is severely corroded and beginning to collapse in some areas. Since most of this system exists underneath Linden Street, roadway collapse has been a concern and has already occurred in a couple areas along this trunkline. This system will continue to cause problems, specifically reduced service capacity and roadway collapse due to pipe failure, unless addressed and replaced within the next few years. This project will be done in phases due to funding constraints. Phase I will begin on the east side of Linden Street approximately 500' south of East Boulevard and continue north to a point 250' north of East Blvd. Phase II will begin where Phase I ends and cross over to the west side of Linden Street. From there, the work continues 1150' north ending at the northwest intersection of Santee Mill Road. Phase I was completed in 2014 and Phase II (final) will be in 2016.

2016 NON-UTILITY CAPITAL IMPROVEMENT PROJECT DETAIL

Mechanical Bureau Truck Lift

\$129,800

Our current lift has hydraulic cylinders, hoses and components that are embedded in concrete and require us to jack hammer the floor up to inspect and repair. This could potentially release oil into the ground with a failure. The average usable life of an in-ground lift like we currently have is 20 years. Ours has been in place for 19 years. The productivity of our fleet depends on our ability to do routine maintenance and repairs fast and efficiently – from under the vehicle. It improves technician access to dramatically speed up maintenance and repairs. The Mechanical Bureau currently has a 2-post in-ground truck lift with a lifting capacity of 30,000 lbs. This allows us to lift approximately 70% of our heavy trucks. This limited lifting capacity requires us to maintain and repair the remainder of our trucks while on the floor using a combination of floor jacks and jack stands. This method is extremely inefficient, requiring far more time and labor to set up and complete repairs than if we could simply lift the vehicles. Technicians must constantly crawl in and out from under the trucks, carrying tools and parts. Since the truck lift bay is the only one large enough to fit the trucks in, techs must also contend with the existing lift infrastructure which often makes under vehicle repairs even more difficult. The proposed replacement lift will have a capacity of 60,000 lbs, which will lift 95% of the heavy trucks in our fleet both now and in the foreseeable future. Other benefits are accessibility of the lift itself for service. The new lift would be completely housed in a concrete trench with steel covers that allow full access to all hydraulics and components for inspection and maintenance with no excavation. This setup is fully EPA compliant with a sealed containment area in case of any ruptured hydraulics. This project was designed, bids secured, and construction to commence in 2015 but most payments to occur in 2016.

These funds are used to make repairs to catch basins, headwalls, culverts, pipes, etc. throughout the City's extensive storm sewer system. We will also replace storm sewer at Stanford Road (\$65,000), replace storm sewer at Santee Mill Road (\$12,000), and replace storm sewer at Millside and Traveller Ave (\$50,000). The Stanford Road project is to extend the storm system from Ralston Road to address flooding further up Stanford Road. The Santee Mill Road project is for the replacement of a deteriorated section of pipe. The Millside/Traveller Avenue project is to alleviate flooding at the intersection of these two roads during heavy rain caused by an undersized pipe with a flat slope that discharges into the Saucon Creek.

Salt Storage Facility

\$500,000

The City plans to demolish the current deteriorating salt storage dome and construct a new storage building with more than twice the capacity of the existing dome. This would help ensure that the City has sufficient supply of road salt on reserve to handle multiple winter storms in succession, reduce the risk of running out when suppliers cannot meet the demand, and make winter operations more efficient. In addition, this will provide more flexibility in procuring salt and hence potentially result in savings to the City. IT Improvement Plan

\$102,666

As part of Phase I of this improvement plan we have successfully completed the following: (1) Purchased and configured our City Hall Virtual Server environment (2) Converted all but 1 server from stand-alone to virtual configuration. (3) Set up a temporary Backup/Disaster Recovery Server at Garrison Street location. The additional funds requested will be used to complete Phase II which includes: Upgrading Obsolete Exchange Server Licenses - \$40,000: We currently own 325 MS 2003 Exchange licenses which allows us to maintain 325 User mailbox accounts. We are currently running a version which MS no longer supports and are forced to purge emails constantly in order to keep our mail server from crashing. As of 2014, we will be 3 releases behind the newest version. Upgrading the Exchange licenses will give us an MS supported version of Exchange, increase the mailbox sizes so we can relax the purging requirements now in place and allow us to purchase enough licenses to accommodate all of the additional mailboxes added since 2003. Upgrading Remaining Workstation Licenses - \$60,000: Over the past few years we have been upgrading workstations and laptops to newer versions of MS Office as funding was available. However we are estimating that around 150 workstations still need to be upgraded to be fully compatible with the newer Exchange Versions. Purchase a Backup/Disaster Recovery Server - \$28,000: We are currently backing up all of our virtual servers to a used temporary server at the R&D site at Garrison Street. We are also relying on this server in case of disaster. Therefore, we would like to purchase a bigger, faster server to accommodate our current and future backup and disaster recovery requirements.
